

Data initiative Journey

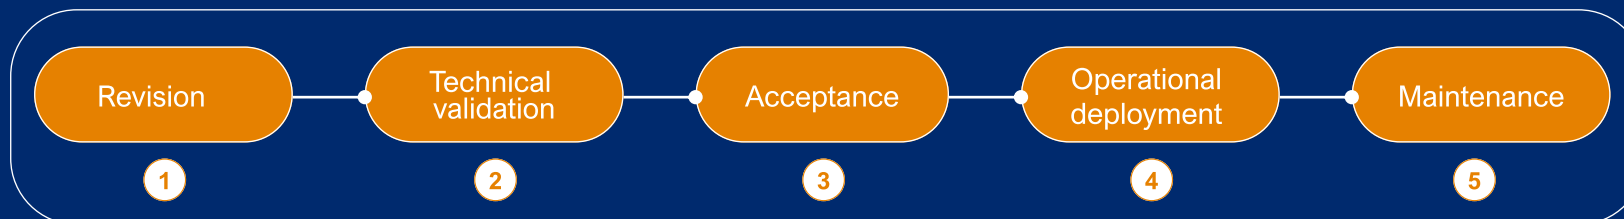

The activities of Simpl-Live run in parallel with the grant agreement and may follow a different timeline depending on the context of each initiative. This represents the standard journey for the selected data initiatives involved in Simpl-Live.

Simpl-Live Journey

Simpl-Live Implementation

Feasibility Study

Contribution to
Simpl-Open

Activities detail

1

Revision

Update integration scenarios and requirement list from the feasibility studies to align with the current maturity of the data spaces and initiatives.

2

Technical validation

Validate technical integration, develop and test key functionalities, address core challenges and define the final solution.

3

Acceptance

Deliver fully implemented business processes, with confirmed functional behaviour, consistent user experience, and design fit, demonstrating readiness for operational use.

4

Operational deployment

Deliver a stable, secure, and optimised implementation supporting actual business operations.

5

Maintenance

Monitor operational stability and improvement of Simpl-Live components while equipping the data space technical teams for independent management.
